SUBJECT INDEX TO VOLUME 16

Accurate Algorithm for Transmission Line Fault Location Using Digital Relay Measurements, 25

Analysis of the HVDC Turbine Generator Torsional Interactions, 303

Analysis of Thyristor Controlled Three-Phase Induction Motor with Alternation of Symmetrical and Unsymmetrical Operation, 59

Application of Critical Machine Energy Function in Power System Transient Stability Analysis, 343

Comparative Study of Different Formulations in Hydro-Thermal Optimal Load Flow Problem, 89

Comparison between Conventional and Segmental Reluctance Motors, 249

Design of a Robust Linear Optimal Regulator for Synchronous Generator Excitation Control, 319

Design of an AC Micromotor: Comparison of Asynchronous and Synchronous Motors, 173

Design of Decentralized Load-Frequency Controllers Using Pole Placement Technique, 193

Direct Fitting Method for Measuring the Parameters of Synchronous Machine Using Direct Current Decay Test, 239

Dynamic Stability of Parallel Connected Synchronous Generators by the Eigenvalue Method, 379

Electromagnetic Transients on Compensated Lines under Corona, 441

Fast Thyrsistor-Controlled AC Voltage Regulator, 225

Feasibility Study of Electric Motors Constructed with High Temperature Superconducting Materials, 15

Field-Oriented Control of Induction Machines in the Presence of Magnetic Saturation, 133

LQI-Type Load-Frequency Control with First-Order Sampling Holder which Improves Control Performance against Rampwise Load Disturbances, 183

Minimum Loss Power Flow in Hydro Thermal Electric Power Systems Based on Kron's Loss Formula, 149

Modelization and Stability of an Asynchronous Motor Drive Supplied at Constant Frequency and Voltage, 77

Modified Sliding Mode (MSM) Versus PI Speed Control of a Current-Controlled

Field-Oriented Induction Motor Drive, 209

New Robust Algorithm for Estimating the State of a Power System, 431

Performance of Hysteresis Permanent Magnet Motors, 265
Power Factor Correction: Economic Feasibility and Technical Limitations, 363

Sensitivity Analysis of Peak Switching Overvoltages in Underground Cables, 331
Simple Model for the Transformer Magnetizing Characteristic, 127
Simulation of a Four Phase Switched Reluctance Motor Including the Effects of Mutual Coupling, 281
Single Chip Microcomputer-Based Current Source Inverter, 49
Stability of Interior Permanent Magnet Synchronous Motors, 411
Steady State Analysis of Wound-Rotor Induction Machines with Simultaneous Stator and/or Rotor Faults, 35
Steady State and Transient Behavior of PWM Inverter Fed Induction Motors, 1
Synchronizing Torque Matrices and Static Bifurcations in Multimachine Power Systems, 157

Thyristorized A.C. Voltage Controller with Sinusoidal Output, 395
Transient Analysis of Solid State Plug Braking of Induction Motors, 107
